

# Access your DataPoints with accountName and Accesskey

```
<html>
<head>
<script src="http://code.jquery.com/jquery-1.4.2.min.js"></script>
<script type="text/javascript">
$(document).ready(function() {
$.ajax({
url: 'http://processeyeapilibrary.azurewebsites.net/access/datapoint/getall',
type: 'GET',
dataType: 'json',
success: function(data) { console.log(data) },
error: function(data) { console.log(data) },
beforeSend: setHeader
});
});
function setHeader(xhr) {
xhr.setRequestHeader('Content-Type', 'application/json');
xhr.setRequestHeader('AccountName', '<Paste your account name here>');
xhr.setRequestHeader('AccessKey', '<Paste your access code here>');
}
</script>
</head>
<body>
</body>
</html>
```

Place the given ajax request to your code

If the request is success you will get a json value with Name,Unit,AccessedIn,Type and an array of Values for the particular dataPoint and you can use this in your code.

Copy the account name from the API keys and paste it in the mentioned path.

Also copy the primary or secondary Access key and copy it in the accesskey path mentioned.
